## PROJECT OBJECTIVE

The aim of our project is; to ensure that the drivers employed in the road transportation sector gain the transferrable professional knowledges, skills and competencies through the utilization of digital technologies in the trainings and examinations and to strengthen the capacity for conducting international business and the communication networks of the vocational education-training providers and other social parties in this sector.

## PROJECT OUTPUTS

### At the end of the project activities;

- A report that addresses the evaluation of the legislation regulating the profession of the drivers employed in the road transportation sector in the project's partner countries, the definition of their profession, the professional standards and national qualifications, trainings, examinations and certifications, the training methods and materials used during the trainings, etc,
- An analysis study where the expectations of the drivers, driver trainers and the employers in the partner countries from the vocational training,
- An analysis study where the professional standards, national qualifications and the training programs related with the professions in the EU and the partner countries are compared and the differences between them are presented,
- A competence map, training methodology and training program for the professions related with the goods and passenger transportation, prepared in participation with all of the project partners in such a manner that will meet the needs of the parties in the sector,
- Training and examination infrastructure and materials prepared to be used in the pilot driver training based on the joint training program in question,
- Testing and reporting of the training methods and materials in all of the partner countries on the drivers and trainers and manuals that will provide guidance to the drivers and trainers will be prepared.
